

Sustainable Procurement Award

The circular economy thrives when businesses use their purchasing power to create demand for recycled, sustainable, and responsibly sourced products.

This award recognises organisations that lead the way in embedding sustainability into their procurement practices, from choosing recycled and low-impact materials to supporting ethical supply chains and innovative delivery methods.

If your organisation is championing sustainable purchasing and driving positive change through what you buy, then apply for this award!

Submit

Sustainable Workplace Supplies Submission:

Tell us about your organisation and its approach to sustainable procurement in 2025.

Please include details about any or all of the following:

- Sustainable and ethical products used in your business
- Proportion of sustainable products purchased (%)
- Use of sustainable logistics, such as cargo bike deliveries
- Examples of how your organisation prioritises recycled, refurbished, reused, or remanufactured products, and ethical, sustainable sourcing in procurement decisions
- How your procurement strategy supports the circular economy and reduces environmental impact
