

# Waste Reduction & Reuse Award

In line with the Waste Hierarchy, reducing and reusing materials is at the heart of every sustainable, circular business.

This award recognises organisations that are driving waste prevention — whether through innovative reuse schemes, smarter design, or waste reduction initiatives that make a measurable difference.

If you're cutting waste at the source, extending product life, or finding creative ways to reuse materials, this award is for you.

**Submit**

## Submission:

Tell us about your organisation and its approach to waste reduction and reuse in 2025.

Please include details about any or all of the following:

- Examples of how your organisation has prioritised recycled, refurbished, reused, or remanufactured products, and ethical, sustainable sourcing in procurement decisions
- Any creative or innovative initiatives implemented to reduce waste and/or reuse materials
- The number of new waste streams implemented
- Reduction in total waste produced (% and kg)
- How you integrate waste reduction and circular economy principles into your operations and/or procurement processes
- How your procurement decisions support waste minimisation (i.e. buying closed-loop products, choosing suppliers with take-back schemes, reducing single-use materials, etc.)

Supporting details can be found on [MyRecorra](#).
