

**Jose
Correia**

Battersea Power Station

Submission

Jose has played a pivotal role in the waste teams performance at Battersea Power Station. Jose is responsible for supervising the team and organising them so that tasks and responsibilities are completed in a timely manner but also to the excellent standards that we set ourselves. When he joined the team, the Power Station's monthly recycling rates were 50% and within 3 months it had jumped up to 65%. After another 3 months the site had achieved 72%, smashing our 12 month aspirational target in half the time given. Without his support, I am sure that we would not have achieved the recycling rates that we have and continue to do so. He has embraced every challenge with the utmost professionalism and has a great working relationship with the his own team and the wider on site team.

Janine Parker, Senior Experience and Relationship Manager had the following to add: "Jose consistently demonstrates the Battersea team spirit values and brings a highly positive attitude to his work. He is considerate and supportive of both his colleagues and the wider team. Jose actively looks for opportunities to improve and provides constructive feedback, particularly within the welfare area."
